

FOR IMMEDIATE RELEASE

OpticalLock Exits Stealth Mode

Company's Products Aimed at Cargo Container and Facilities Security

SAN DIEGO, Calif., November 17, 2015 – OpticalLock® publicly announces itself to the world and website goes live.

San-Diego-based OpticalLock® today unveiled its new website along with its plans to revolutionize the stodgy padlock business with a high-tech approach that adds tamper-detection and real-time wireless tracking and alerting features in a traditional padlock form factor.

The new [electronic lock](#) & security company was formed in 2014 in response to a large perceived need in the security industry marketplace and is based in San-Diego, CA USA. The founders and management team are comprised of industry veterans with decades of combined experience working in and leading computer, electronics and government contracting companies.

“OpticalLock® was formed to address rampant issues with [shipping container security](#) as well as the security of other high-value goods and facilities,” stated Carol Fuller, Founder and CEO of OpticalLock®. “We see a huge opportunity to improve security and [tamper-detection](#) in a wide range of industries. We intend to capitalize on the need for enhanced security with our patented technology and unique product offerings. ”

The company's first product is currently in testing and will be available to the broader market soon. The product is based on a patented fiber optic technology. The OpticalLock® system consists of a locking device in a traditional padlock form factor, a mobile Smartphone application for security verification/communications and secure, cloud-based database software for administration, storage and tracking. The familiar padlock form factor of the locking device allows for maximum flexibility and usage in a wide variety of applications; essentially anywhere a traditional padlock can be used.

OpticalLock® is recruiting qualified distribution partners in a variety of vertical and geographic markets worldwide. Target vertical markets include conventional [container lock](#) distribution, government security, industrial security, [supply chain security](#) and shipping companies dealing in high value goods. The patented OpticalLock® technology, OpticalShield™, is also available for licensing by third party manufacturers for products lying outside of core OpticalLock® markets.

For more information visit the [products](#) section of the OpticalLock® website or contact the company directly by email at sales@opticallock.com or by phone at 619.417.6685.

About OpticalLock

OpticalLock® is a new technology company formed to solve issues faced by a number of industries in the area of tamper prevention & detection and tracking of **high value goods**. The first product is a tamper-detection device which can be used as a drop-in replacement wherever a traditional padlock can be used. A key target market is shipping containers, but the product provides tamper-detection benefits to secure high-value goods in any room or container which can use a traditional padlock. The company was founded in 2014, is privately held and based in San Diego, CA. USA. More information is available on the company website at <http://www.opticallock.com>
